KEY TO PRODUCT LISTINGS

How to Find a Product

Products are listed alphabetically by their prevailing names as explained below.

Trademarked Name. An example is "Valium," the original brand of diazepam. You will find information on this product under "V" rather than "D." Under the generic name of multi-source products like diazepam, you'll see a cross-reference to the brand. If there is only one source of a product, you'll find a listing for the brand name only.

Generic Name. A generic name like "diazepam" is followed by listings for each company offering the product. If the company markets it under the generic name, product information is included. If the company uses a trade name, there's a cross reference to it. Looking down the list of firms marketing diazepam, for instance, you'll find a cross-reference to Valium under Roche/PR.

Manufacturer's Name. If a product forms part of a line known primarily by its manufacturer's name, that's where you'll find it. For example, syringes and needles made by Becton-Dickinson & Co. appear under "B."

How to Read the Listings

The first line of each listing generally gives a product name, drug class symbol, and the name of a company. If it's a brand-name listing, this information is followed by the generic name. If it's a generic listing, the company name shown is the first in an alphabetical list of several firms marketing the product. Company names are

Drug Class Symbols

The following descriptive symbols indicate a product's status under the Controlled Substances act of 1970. They apply to all entries under the product name or dosage form in which they appear. Use these symbols only as a guide. Check the manufacturer's label for definitive information.

- Ⓒ High Potential for Abuse. Prescriptions must be written in ink or typewritten and signed by the practitioner. Verbal prescriptions must be confirmed in writing within 72 hours and may be given only in a genuine emergency. No renewals.
- Ⓓ Some Potential for Abuse. Prescriptions may be oral or written. Up to 5 renewals are permitted within 6 months.
- Ⓔ Low Potential for Abuse. Prescriptions may be oral or written. Up to 5 renewals are permitted within 6 months.
- Ⓕ Subject to State and Local Regulation. Abuse potential is low; a prescription may not be required.
- Rx Prescription only; not a controlled substance

abbreviated. For the complete name, address, and phone number, consult the Manufacturer Information section.

Following the company heading, you'll find entries for each form (tablet, capsule, cream, etc.), strength, and quantity of the product available from the designated firm. The entry includes the "Orange Book" code if applicable, the appropriate NDC (National Drug Code) or product number, the average wholesale price, and either the direct or suggested retail prices, as available. Listed in the left-hand column below, you'll find the Drug Class Symbols and their definitions.

Interpreting the Price Information

Prices are shown in two columns. The first contains the average wholesale price (AWP). The second contains the direct price (DP) for Rx listings or the suggested retail price (SRP) for OTC and non-drug listings, when available. The DP is shown in plain type. The SRP is printed in bold.

Unit prices are identified as "ea," "per pkg," "per unit," "per case," or "per carton." The "per gross" price applies to quantities of 144 units.

Form	Quantity	NDC	Direct Price (Rx) or Suggested Retail Price (OTC)
Tab	100 mg, 50s each	BX 53335-0080-11	12.70 25.40
	100s each	BX 53335-0080-11	12.70 25.40
	200 mg, 50s each	BX 53335-0080-11	12.70 25.40
	Strength	OBC (Orange Book Code)	AWP (Average Wholesale Price)

All prices are current as of the date RED BOOK went to press. However, actual prices paid by retailers may vary; and all prices are subject to change without notice.

The prices shown here are based on data obtained from manufacturers, distributors, and other suppliers. While great care has been exercised in compiling this information, the publisher of RED BOOK does not warrant its accuracy. The information may be supplemented by subscribing to the monthly RED BOOK UPDATE or by obtaining prices published in catalogs or other printed materials disseminated by manufacturers or distributors.
